

CSc 110 Lab Assignment 3
Static Methods & Variables
Due: June 5rd at 11:55pm

Learning Outcomes:

When you have completed this assignment, you should understand:

- How to evaluate expressions
- How to declare `int` and `double` variables
- How to write and call a `static` methods with `parameters`.
- How to write definite loops
- How to design, compile, run and check a simple and complete Java program on your own.
- How to indent and document a Java program.

1. Question #1 Page 189

2. Question #2 Page 189

3. Question #3 Page 189

Put all three static methods in the same class file called `Assignment3.java` and add the following calls to your main method.

```
printNumbers(10);
```

```
printPowersof2(9);
```

```
printPowersofN(-3,7);
```
